

# Twitter account

---

## a) How did you color the background blue

- I set the background-color of the body to blue

## b) For the right column how did you get the image next to the text and button?

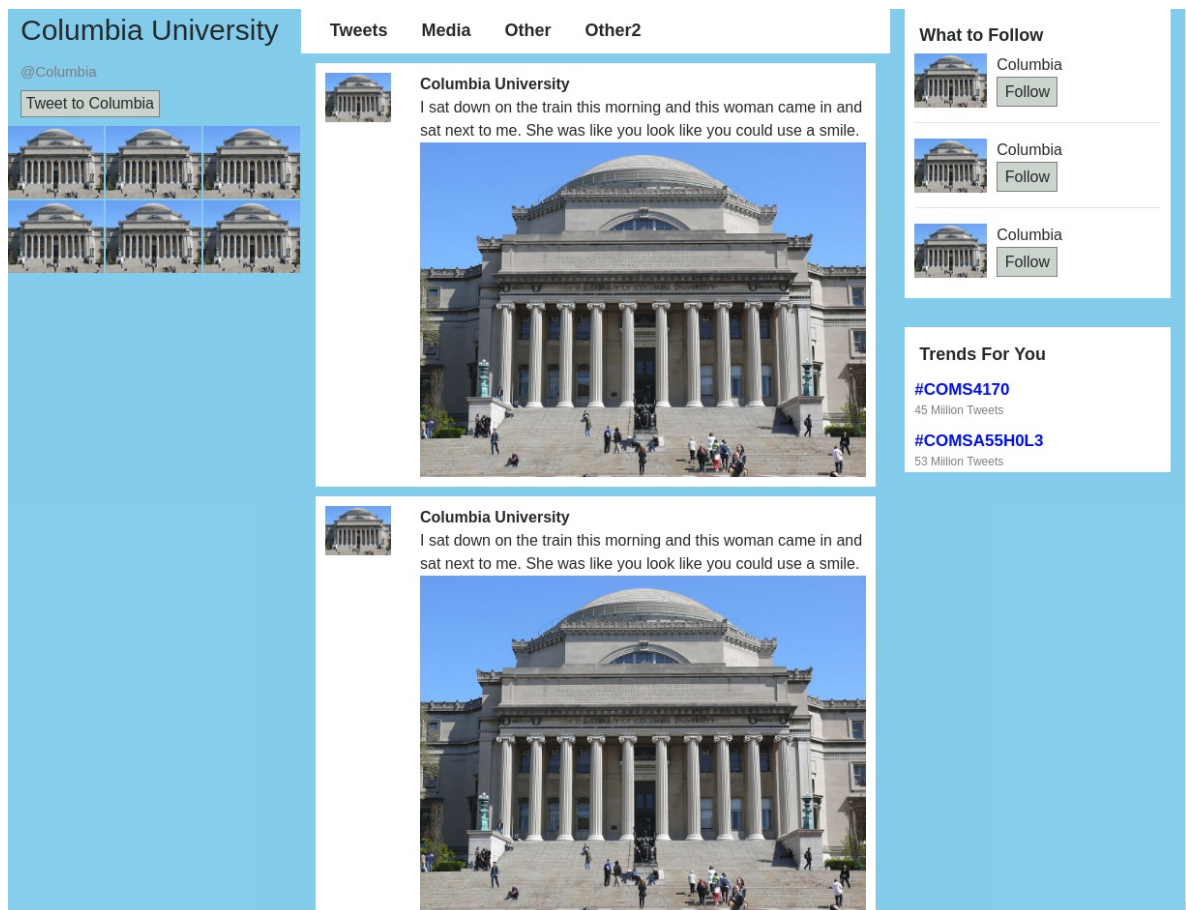

- I used a flex box to create my own row and column classes. Then I put the image in a column, and the text in a different column

## c) How did you get the text not to be centered?

- It didn't center for me by default. One could use the `float: left` to keep the text to the left.

## d) Container fluid

- Making container fluid removes the padding from the sides
- Screen shot

## e) what 3 tools to highlight the links?

- color
- size
- contrast

## f) How to separate the posts

- I set the margin on the post object
